

Dr Andrew Morris, MD, Consultant and Senior Lecturer in Paediatric Metabolic Medicine. Willink Metabolic Unit, Central Manchester University Hospital, UK

Andrew Morris is a Consultant and Senior Lecturer in Paediatric Metabolic Medicine. He works on the Willink Metabolic Unit, which is part of Genomic Medicine in the Central Manchester University Hospitals and serves the North of England through a clinical network. He was previously a consultant in Newcastle-upon-Tyne and at Great Ormond Street Hospital in London. His research has primarily concerned mitochondrial disorders and fatty acid oxidation defects but he has wide experience of inborn errors of metabolism and a particular interest in teaching. He was Leader of the Classical Homocystinuria Guidelines Group for E-HOD, the European Network and Registry for Homocystinurias and Methylation Defects.
